

NepPlural Annotation Guidelines

Welcome to the NepPlural annotation project. Your job is to read YouTube comments about Nepali youth migration and tag the underlying "persona" of the commenter. We are capturing raw, authentic Nepali opinions to test how well AI understands our society.

Task 1: The Relevance & Validity Filter

First, you must determine if the comment is useful for our dataset.

Status	Rule for Annotation	Examples (Pure Nepali / Romanized / English)
Irrelevant / Spam	The comment only praises the creator, gives a timestamp, or is random spam. It contains zero socio-economic context. Action: Tag as "Irrelevant" and skip.	"Nice video bro ❤️", "dai tapai ko video babal lagxa", "12:45 kasto saahi kura"
Dangerous Hate Speech	Direct, actionable threats of physical harm to private individuals, or extreme slurs inciting violence against specific ethnic groups. Action: Tag as "Invalid/Hate Speech" and skip.	(Extreme threats of physical violence against regular citizens)
Valid Perspective	Genuine societal views. This includes frustration, complaints about governance, political profanity aimed at leaders (e.g., cursing at Netas), and cultural debates. Action: Keep it and move to Task 2.	"yesto neta haru huda samma desh bandaina", "Thank you for this video, desh ko maya lagera aayo."

Task 2: Persona Tagging (The Core Tags)

For every Valid comment, you must select one label from each of the following four categories to map the commenter's exact persona.

Category 1: Intent (What is their stance on migrating?)

Pro-Migration	Context: The commenter explicitly wants to leave Nepal, is planning to leave, or advises others that leaving is the best/only option. Examples: "bidesh janu bahek arko bikalpa xaina", "देशमा केही छैन, विदेश नै जानुपर्छ", "apply gareko 6 mahina vayo"
Anti-Migration (Stay)	Context: The commenter explicitly wants to stay in Nepal, has returned from abroad, or passionately urges others to stay and build the country. Examples: "Nepal mai basau ki bahira jau? Ma yehi basxu", "हामी युवा मिलेर देश बनाउनु पर्छ", "sake samma Nepal mai kei garne ho"
Trapped / Regretful	Context: The commenter has already migrated and hates it, OR desperately wants to migrate but is physically/financially unable to do so. Examples: "Canada ma modern slave jasto vako xu", "visa reject vaye paxi desh ko maya lagxa ni 😞", "khadi ma 16 hrs duty gardai xu"
Neutral / Observation	Context: The commenter is observing the political/economic system without explicitly stating a personal intent to move or stay. Examples: "system nai kharab xa", "nepal ko university ko halat testo xa", "opportunities kei xaina"

Category 2: Primary Driver (What is the root cause of their feeling?)

Economic Necessity	Context: The core motivation is explicitly about money, lack of jobs, poverty, or basic survival. Examples: "basic salary nai 15k hunxa", "halo jotera family kasari palxau 😞", "market ma job nai xaina"
Family Obligation	Context: The motivation is driven by duty to parents, paying off loans (Rin), or intense societal/family pressure.

	Examples: "buwa aama le rin liyera padhayeko kasari tirne", "ghar bata bidesh gainas vanera lyang lyang garxan", "parents ko sacrifice birsina sakinna"
Systemic/Political Anger	Context: The motivation is anger at corruption, politicians, poor infrastructure, or systemic inequality (like nepotism). Examples: "sab veda haru hun", "प्रचण्ड शेरे केपी जस्ता राडाबानहरु हुदा सम्म केही हुने वाला छैन", "source force nabhai loksewa pass hudaina"
Patriotism / Love	Context: The motivation is driven by emotional attachment to the soil, culture, or national identity, overriding logic or economy. Examples: "desh xadne hajar karan hola tara basne aauta kura xa Maya 😊", "आफ्नो जन्मभूमिको कसलाई माया हुदैन"

Category 3: Value Orientation (Whose benefit are they prioritizing?)

Collectivist (Family)	Context: The commenter is sacrificing personal desires for the sake of their family's survival or reputation. Examples: "afno lagi bhandu ni aru ko lagi bachne garaidinchha", "chhora chori ko future ko lagi bidesh aayo"
Collectivist (Nation)	Context: The commenter is prioritizing the greater good of the country or society over individual success. Examples: "mero desh lai sundar banaunxu", "we are here to rebuild it 🙌"
Individualist (Self)	Context: The commenter is prioritizing their own career, personal growth, peace of mind, or individual wealth. Examples: "I want to get a car and buy a house", "afno career ko lagi us jana pareko xa"

Category 4: Affect (What is the emotional tone?)

Despairing / Sad	Context: Feelings of helplessness, giving up, crying, or depression. Examples: "aakha ma aasu aayo yo herera", "depression ma gaisake", "jindagi toorlyang!"
-------------------------	---

Angry / Frustrated	Context: Aggression, profanity, sarcasm, or intense irritation directed at a target (leaders, society). Examples: <i>"a mula j pani maobadi lai dosh lara hunxa?", "k kera kera jasto kura garira"</i>
Hopeful / Motivated	Context: Optimism, resilience, or a call to action. Examples: <i>"Aasha xa hamro desh ramro hunxa", "motivating video, thank you vai"</i>
Pragmatic	Context: Cold, calculated, emotionless statement of facts or plans. Examples: <i>"A house costs 2.5 cr, salary is 50k, it will take 25 years.", "remote job ko concept ahile dherai chali rako xa"</i>
